

RED TEXTURIZED COAT

Another Step by Step using the Greenstuff World paints to test the main colors: a bright red textured coat.

1. Undercoated and preshaded model with spray (as seen on a previous SBS).

2. Basecoat with Sangria Red.

3. First highlight stippling with Red Truth, covering most of the area.

4. Second highlight stippling with a 80/20 mix of Red Truth and Golden Cream.

5. Third highlight stippling with a 50/50 mix of Red Truth and Golden Cream.

RED TEXTURIZED COAT

6. Keep highlighting with a 20/80 mix of Red Truth and Golden Cream.

7. Add a bit of Fang White to the 1.6 step mix to give the final highlight.

8. Apply 2-3 general washes with highly diluted (70% water) Red Truth to the whole piece to recover the reddish tone and smooth the texture.

9. Using a 90/10 mix of Banana Split and Red Truth, outline the edges of the surfaces and add some fine texture lines and spots.

RED TEXTURIZED COAT

10

10. Outline the shadow zones with Abyss Blue, with thin lines.

11

11. The final step is a thin glaze with highly diluted Abyss Blue, to get some extra shadows and enrich the general tone.

12

12. This is the final picture with all the additional elements of the coat painted.

Hope you like it! ;)
