

## GREY MILITARY COAT

Another Step by Step using the Greenstuff World paints to test the main colors: A grey military coat.

1. Priming with Black Matt primer.

2. Basecoat with a 50% mix of Black Stallion and Chancellor Blue.

3. First highlight stippling with a mix of approximately 2/3 of Chancellor Blue and 1/3 of Sun-Bleached Bone.

4. Second highlight stippling again with a mix of 2/3 of Chancellor Blue and 1/3 of Ivory Tusk.

5. The third highlight is made using only a 50% mix of Chancellor Blue and Fang White.

6. Final highlight 80/20 % mix of Fang White and Chancellor Blue.

## GREY MILITARY COAT

7. Now I gave 2-3 general glazes with diluted (60% water) Chancellor Blue to soften the textures and homogenize all the surface.

8. In the next step I give in the shadow areas 2-3 glazes of a highly diluted (80% water) mix of Black Stallion and Sangria Red (40/60%) to add some deep to the shadows by using a bit of complimentary tones.

9. Using dense Banana Split I recover the final highlights points and put some aggressive yet fine texture lines.

The final step consist again in a couple of general washes of highly diluted mix of Black Stallion and Sangria Red (40/60%) to soften the whole piece.

This final picture has a coat of matt varnish and some extra elements of the piece finished.

Ready! Hope you like it ;)
